

## Phases of Mitosis Poster

Use your guided notes, group work sheet or text book (pages 364-368). Arrange the cut out pictures so that the illustrations represent the correct order of the phases of the cell cycle. When you know you have placed the drawings in the correct order, RAISE your hand to get a check from Mrs. Rajah. Once you have the OK, glue the cell drawings onto piece of paper, so that you have a mini-poster of mitosis. Label the name of the phase under the correct illustration. More than one picture may be in each phase. Label the nucleus, centrioles, chromosomes and spindle fibers ONCE in the poster.
